

BUY NOW, PAY LATER

Need to deploy technology while protecting your cash reserves?

With our “Buy Now Pay Later” solution, you can take delivery of the equipment now while deferring your payments for up to 6 months. Furthermore, we can structure a step payment profile, such that your payments ramp up in line with budget availability.

What’s in it for you?

- Get instant access to the latest technology without large upfront costs

- Ensure your business remains agile by not being restrained by budget availability

- Focus on core activities while Econocom liaises directly with the suppliers of your choice

- Remove administrative burden as all approved invoices are drawn down into one contract

- Benefit from a complete e-waste plan at the end of the contract

How it works

1. You place orders with your supplier(s)

2. Suppliers deliver the order and you start using the tech right away

3. Suppliers invoice Econocom

4. Econocom sends invoices to you for approval

5. Once approved, Econocom pays the suppliers

6. Your monthly or quarterly payments to Econocom don't start until an agreed date
